EXPERIENCE

Lifemark Health Group

Toronto, ON

AI Systems Engineer Intern

May 2026 – Present

- Engineered a clinical proofreading system in Microsoft Word using **Python** and **Azure** that flags mistakes and inconsistencies in med-legal reports, saving **10+ hours** of manual review weekly
- Automated referral intake in Outlook using **Azure OpenAI Service** to extract structured data, categorize requests, and route **80+ referrals/week** to the right staff

Tech for Social Impact

London, ON

Project Manager

Sept. 2025 – Apr. 2026

- Led 6 engineers building internal tools for **100+ Canadian Red Cross** employees, cutting stale content by **40%** and closing a surveyed **30%** staff engagement gap

Unity Health Toronto

Toronto, ON

AI Research & Engineering Intern

Jul. 2025 – Sept. 2025

- Designed a clinical interview system using **LangGraph**, implementing graph-based control flow to administer a standardized psychiatric diagnostic interview as a structured agentic pipeline
- Built a multi-stage evaluation pipeline combining rule-based classification, LLM scoring, and **spaCy** PII redaction, reducing hallucination rates by **35%** during clinical data ingestion

PROJECTS

Primate | *Founder* | **AWS, Docker, Playwright, React, Python** | primate.sh

Feb. 2026 – Aug. 2026

- Architected a GitHub-integrated **CI/CD** platform that triggered on pull requests to provision ephemeral **EC2** environments and return UI test results in **<4 minutes** per pull request
- Built an autonomous **AI QA agent** using a vision-language model and **Playwright**, containerized with **Docker**, to navigate complex web applications and automate end-to-end UI testing workflows

Synergy Scribe | *Python, FastAPI, AWS, Terraform*

Aug. 2026 – Sept. 2026

- Developed a clinical documentation platform for Synergy Health Centre, used by **20+ clinicians**, that turns live transcription into structured medical report fields
- Built a concurrent AI extraction pipeline that maps live transcripts into complex medical report schemas, using structured validation to reliably populate individual report fields

Optimate | *Python, TypeScript, Next.js, AWS, Cohere* | [GitHub](#) | [Demo](#)

Sept. 2025

- Won **Federato & Y Combinator** prizes at **Hack the North 2025** vs 1,000+ hackers with an AI-assisted underwriting platform that parses insurance contracts and surfaces risk insights

PUBLICATIONS & RESEARCH

Machine Learning Researcher | *Algoverse AI Research*

Jan. 2025 – Jun. 2025

- Co-authored **Comanche Case Study** published at **AmericasNLP @ NAACL 2025** and accepted to a **NeurIPS 2025** workshop; built and open-sourced the first digitized Comanche dataset (**412 phrases**)
- Raised LLM language identification accuracy on Comanche from **13.5%** (zero-shot) to **100%** with 3-shot prompting, while holding English accuracy at **97%+**

TECHNICAL SKILLS

Languages: Python, Go, TypeScript, Java, SQL

Frameworks and Libraries: React, Next.js, Node.js, FastAPI, PyTorch, LangGraph, Playwright

Tools and Platforms: Docker, AWS, Azure, Terraform, Linux/UNIX, GitHub Actions, PostgreSQL, pgvector, Redis

EDUCATION

Western University

London, ON

B.Sc. Honours Specialization in Computer Science, Minor in Mathematics | *GPA: 3.7*

Expected May 2028
